

Workbook : Verruca Pathology

This workbook has been designed to be used in conjunction with the course reading booklet. You are free to complete as few or as many of the tasks as you wish. The workbook can then be added to your CPD portfolio as evidence of your activity. It also provides room for you to reflect your thoughts in relation to this course and your learning experience.

Self-assessment : Section 1.

1	Why must viruses infect a host cell as part of their life cycle?
2	What is a nucleocapsid?

3	What is the difference between a naked virus and an enveloped virus?
4	What benefits are the for a virus which does not have an envelope?
5	What are commonest forms of viral transmission?
6	Is it possible for a virus to contain both RNA and DNA?

7

Briefly describe the replication process of a virus.

8

In HPV infection, which cells are initially affected by the virus?

9

What happens to epidermal cell proliferation and differentiation once there has been HPV infection?

10

What are the roles of E6 & E7 proteins?

Reflection.

Take some time to think about the learning that you have completed using this course. Was it useful, was it interesting, was it applicable to your practice? Is there anything in particular you have gained from the course, and does it encourage you to alter your practice? Have you enjoyed it?

These are all questions you should ask yourself before you complete your reflective account below, as these are key points that you need to mention.

How much time have you spent completing this course?	
Did you complete the course on your own, or as part of a learning group?	

Your general reflective account :
