

Renal Disease Weblinks

www.edren.org

Website of the Renal Unit, Royal Infirmary of Edinburgh; information about individual diseases, protocols for immediate in-hospital management and a list of educational resources, including key cases; extensive links to other resources

www.ndt-educational.org/guidelines.asp

Website of the European renal association giving agreed European Best Practice Guidelines for the management of anaemia, transplantation and haemodialysis

www.nephron.com

The links under 'professional resources' are particularly good and include useful urology links; includes an MDRD (Modification of Diet in Renal Disease study) calculator for estimating GFR from serum creatinine; extensive links to other resources

www.renal.org/CKDguide/ckd.html

Website of the UK Renal Association; link to guidelines on the detection, referral and management of chronic kidney disease.
